

Hi Jacques,

I set the table up last monday. Your craftsmanship is unequalled ... by far the nicest table that I have ever setup! Only took about 2 hours to assemble, mount the arm, calibrate, and align the cartridge.

It was a breeze and a joy to put together. BTW the MVSS system is genius, just the touch of stability needed to create perfection.

How does it sound? WOW!

The soundstage is fantastic! Wide and deep, with pinpoint and rock-solid imaging. The images are seperated cleanly with no smearing, just open space and "air". Excellent inner detail and overall tonal balance with proper warmth. And accurate, soft, life-like sibelence on female vocals as I have not heard before. It is by far the quietest and most dynamic turntable I have ever heard !

I can go on and on.....
